

MODULE	LEARNING OBJECTIVES	ACTIVITIES	ASSESSMENTS
Module 0 START HERE: Course Orientation	● 0.1 Configure Canvas notification settings and verify access to required course platforms and tools ● 0.2 Examine course policies, grading criteria, and campus support resources to prepare for academic success ● 0.3 Compose a reflective learning plan connecting personal goals and prior experience to course learning outcomes	● Syllabus and course policy review ● Canvas navigation and tools tour ● Academic integrity and AI use overview	● 0.5 Question & Discuss  Let's Get to Know Each Other (intro. discussion) ● 0.6 Confirm Your Course Readiness & Syllabus Review
Module 1 Welcome and A+ Roadmap Primary CLOs: ● I, IV, VI, VIII	● 1.1 Describe the key roles and responsibilities of an IT specialist in an organizational setting ● 1.2 Apply a structured troubleshooting methodology to solve technical problems effectively ● 1.3 Demonstrate critical thinking skills when approaching unfamiliar technology challenges	● Read Sections: 1.1 - 1.3 ● 1.1 - The Hero of Problem Solving ● 1.2 - The Troubleshooting Methodology ● 1.3 - Additional Resources	● 1.4 - Module Quiz
Module 2 System Components and A/V Workstations Primary CLOs: ● I, II	● 2.1 Identify various cable types, connectors, and their specific uses in computer systems ● 2.2 Install and configure motherboards, CPUs, and add-on cards according to system requirements ● 2.3 Connect legacy devices to modern systems using appropriate cables and adapters	● Read Sections: 2.1 - 2.5 ● 2.1 - Cables and Connectors ● 2.2 - Motherboards ● 2.3 - Legacy Cables ● 2.5 - Additional Resources	● 2.4 - Lab: Set up an A/V Workstation ● 2.6 - Module Quiz
Module 3 Installing System Devices Primary CLOs: ● I, II, III	● 3.1 Install and troubleshoot appropriate power supplies and cooling systems based on system requirements ● 3.2 Compare and select storage devices based on performance needs and reliability requirements ● 3.3 Configure memory modules according to motherboard specifications and performance goals	● Read Sections: 3.1 - 3.6 ● 3.1 - Power Supplies and Cooling ● 3.2 - Storage Devices ● 3.3 - System Memory ● 3.4 - CPUs ● 3.6 - Additional Resources	● 3.5 - Challenge Lab: Troubleshoot Memory ● 3.7 - Module Quiz ● 3.8 Question & Discuss  Right to Repair vs. the Locked Machine
Module 4 Troubleshooting PC Hardware Primary CLOs: ● I, II, VIII	● 4.1 Configure and troubleshoot BIOS/UEFI settings to resolve boot and security issues ● 4.2 Diagnose and repair power supply and storage drive failures using systematic processes ● 4.3 Identify and fix system performance and display issues through methodical troubleshooting	● Read Sections: 4.1 - 4.6 ● 4.1 - BIOS and UEFI ● 4.2 - Power and Disk Issues ● 4.3 - System and Display Issues ● 4.6 - Additional Resources	● 4.4 - Lab: Resolve PC Hardware Support Tickets ● 4.5 - Lab: Troubleshoot a Malfunctioning Computer ● 4.7 - Module Quiz ● 4.8 - Checkpoint Review

MODULE	LEARNING OBJECTIVES	ACTIVITIES	ASSESSMENTS
Module 5 Comparing Local Networking Hardware Primary CLOs: III, IV	5.1 Classify network types and determine the appropriate network architecture for specific business needs 5.2 Install and configure networking hardware devices including switches and network interface cards 5.3 Select and implement appropriate cable types based on network requirements and environmental factors	- Read Sections: 5.1 - 5.5 5.1 - Network Types 5.2 - Networking Hardware 5.3 - Network Cable Types 5.4 - Wireless Networking Types 5.5 - Additional Resources	5.4.13 - Lab: Secure a Small Wireless Network 5.4.14 - Lab: SOHO Wi-Fi Configuration Settings 5.4.15 - Lesson Review 5.6 - Module Quiz 5.7 Question & Discuss 🗣️ Kill the Cable?
Module 6 Configuring Network Addressing and Internet Primary CLOs: III, IV	6.1 Compare different internet connection types and select appropriate networking hardware for specific needs 6.2 Configure TCP/IP settings on client computers and SOHO routers to enable network communication 6.3 Identify communication protocols and explain how they facilitate data transfer across networks	- Read Sections: 6.1 - 6.6 6.1 - Internet Connection Types 6.2 - TCP/IP Concepts 6.3 - Network Communications 6.4 - Network Configuration Concepts 6.6 - Additional Resources	6.5 - Challenge Lab: Install a SOHO Network 6.7 - Module Quiz
Module 7 Supporting Network Services Primary CLOs: III, IV, VII	7.1 Identify various types of network servers and explain the services they provide to users 7.2 Compare different network appliances and embedded systems used in modern networks 7.3 Apply systematic troubleshooting techniques to diagnose and resolve common network issues	- Read Sections: 7.1 - 7.5 7.1 - Networked Host Services 7.2 - Internet and Embedded Appliances 7.3 - Troubleshoot Networks 7.5 - Additional Resources	7.4 - Lab: Troubleshoot a Network Issue 7.6 - Module Quiz 7.7 - Checkpoint Review (modules 5 - 7) 7.8 Question & Discuss 🗣️ What's the One Service You Can't Lose?
Module 8 Summarizing Virtualization and Cloud Primary CLOs: I, II, III	8.1 Implement client-side virtualization using hypervisors to support application testing and development 8.2 Compare cloud deployment models and service offerings to determine appropriate business solutions 8.3 Evaluate resource requirements for virtualization and cloud environments based on specific needs	- Read Sections: 8.1 - 8.3 8.1 - Client-Side Virtualization 8.2 - Cloud Concepts 8.3 - Additional Resources	8.2.4 - Lab: Use the Azure Interface 8.2.6 - Lab: Manage IaaS Virtual Machines in Azure 8.2.9 - Lesson Review 8.4 - Module Quiz

MODULE	LEARNING OBJECTIVES	ACTIVITIES	ASSESSMENTS
Module 9 Supporting Mobile Devices Primary CLOs: I, II, VII	9.1 Select and configure appropriate accessories and connectivity options for mobile devices based on user needs 9.2 Implement mobile device management techniques including app deployment and data synchronization 9.3 Perform basic hardware repairs and apply systematic troubleshooting methods to resolve common mobile device issues	- Read Sections: 9.1 - 9.6 9.1 - Mobile Accessories and Connectivity 9.2 - Mobile Apps and Data 9.3 - Laptop Hardware 9.4 - Troubleshoot Mobile Devices 9.6 - Additional Resources	9.5 - Challenge Lab: Mobile Hardware Support 9.7 - Module Quiz 9.8 Question & Discuss  Where Should the Work Live?
Module 10 Supporting Print Devices Primary CLOs: I, II, VI	10.1 Configure printers and multifunction devices with appropriate drivers, security settings, and network connectivity 10.2 Perform routine maintenance procedures for different printer types to ensure optimal performance 10.3 Apply systematic troubleshooting techniques to diagnose and resolve common printer issues	- Read Sections: 10.1 - 10.5 10.1 - Printers and Multifunction Devices 10.2 - Print Device Maintenance 10.3 - Troubleshoot Print Devices 10.5 - Additional Resources	10.4 - Lab: Resolve Print Services Support Tickets 10.6 - Module Quiz
Module 11 Finals - part 1 of 2, Core 1 Domain Exams Primary CLOs: I, II, III, IV, V, VI, VII	11.1 Demonstrate comprehensive knowledge across five key A+ Core 1 domains 11.2 Analyze exam results to identify personal strengths and improvement areas 11.3 Apply effective test-taking strategies to work through various question formats	- Read Sections: B.1.1 - B.1.4 - B.1.1 - Why Take a Certification Exam? - B.1.2 - Exam Details for A+ Core 1 (220-1201) - B.1.3 - How to Take the Certification Exam - B.1.4 - Tips for Taking the Exam - Review of Modules 2 - 10	B.2.1 - Exam Domain 1 Mobile Devices B.2.2 - Exam Domain 2 Networking B.2.3 - Exam Domain 3 Hardware B.2.4 - Exam Domain 4 Virtualization and Cloud Computing B.2.5 - Exam Domain 5 Hardware and Network Troubleshooting B.3 Question & Discuss  The Last PC Technician? (Overall Course Concepts)
Module 12 FINAL - part 2 of 2, Core 1 TIMED Exam Primary CLOs: I, II, III, IV, V, VI, VII, VIII	12.1 Demonstrate mastery of identifying, installing, and configuring motherboards, system devices, and peripheral connections 12.2 Apply troubleshooting to diagnose and resolve issues with hardware, networks, mobile devices, and print systems 12.3 Implement proper network configurations including addressing, connectivity options, and essential network services	- Comprehensive review of Modules 2 - 10 - Module 11 practice exam gap analysis - Final preparation and time management strategies	B.2.6 - Final Exam A+ 220-1201 Core 1 90 questions 90 minutes PBQs included
