

MODULE	LEARNING OBJECTIVES	ACTIVITIES	ASSESSMENTS
Module 0 START HERE: Course Orientation	● 0.1 Configure Canvas notification settings and verify access to required course platforms and tools ● 0.2 Examine course policies, grading criteria, and campus support resources to prepare for academic success ● 0.3 Compose a reflective learning plan connecting personal goals and prior experience to course learning outcomes	● Syllabus Review ● Course policy review ● Canvas navigation ● VS Code and browser tools review ● Academic Integrity ● AI use overview	● 0.5 Question & Discuss  Let's Get to Know Each Other (intro. discussion) ● 0.6 Confirm Your Course Readiness & Syllabus Review
Module 1 The Internet and the World Wide Web Primary CLOs: ● I, II, III	● 1.1 Explain how the Internet, the web, browsers, and servers work together to deliver a web page ● 1.2 Describe how IP addresses, DNS, domain names, and the parts of a URL work together to locate a page on the web ● 1.3 Compare web sources and practices for reliability, authorship, security, and ethical use when choosing what to trust on a project	● Read Sections: 1.1 - 1.5 ● Practice: Try It Yourself ● Debug: Fix It  ● Answer: Quick Checks ● Recall: Retrieval Practice ● Review, Further Reading, and Looking Ahead	● 1.6 Skills Lab - Trace the Web, Then Judge It (Parts 1-3 and Questions & Analysis)
Module 2 Basic HTML Elements Primary CLOs: ● IV, V	● 2.1 Build a complete HTML document in VS Code that uses the required structure: doctype, html, head, and body ● 2.2 Structure page content with headings, paragraphs, lists, and links, choosing each element by the meaning of its content ● 2.3 Diagnose markup errors in an HTML document by interpreting W3C validator reports	● Read Sections: 2.1 - 2.5 ● Practice: Try It Yourself ● Debug: Fix It  ● Answer: Quick Checks ● Recall: Retrieval Practice ● Review, Further Reading, and Looking Ahead	● 2.6 Skills Lab - Build Copperwind's Recycling Guide (Parts 1-3 and Questions & Analysis)
Module 3 Semantic HTML and Images Primary CLOs: ● V	● 3.1 Structure page content with semantic elements, choosing landmarks and text-level elements by the meaning of their content ● 3.2 Embed images with the img element, writing alt text that matches each image's purpose on the page ● 3.3 Differentiate the web's image file formats by their properties to select the right format and folder home for a given image	● Read Sections: 3.1 - 3.5 ● Practice: Try It Yourself ● Debug: Fix It  ● Answer: Quick Checks ● Recall: Retrieval Practice ● Review, Further Reading, and Looking Ahead	● 3.6 Skills Lab - Give Copperwind's Site Structure and Pictures (Parts 1-3 and Questions & Analysis) ● 3.7 Question & Discuss  Writing for Robots?
Module 4 CSS Foundations Primary CLOs: ● IV, V, IX	● 4.1 Connect CSS to HTML pages through inline styles, internal stylesheets, and external stylesheets, choosing the method that fits the job ● 4.2 Write CSS rules that style page content using element, class, and id selectors with the web's color systems ● 4.3 Critique styled pages with the W3C HTML and CSS validators, interpreting their reports to repair markup and styling defects	● Read Sections: 4.1 - 4.5 ● Practice: Try It Yourself ● Debug: Fix It  ● Answer: Quick Checks ● Recall: Retrieval Practice ● Review, Further Reading, and Looking Ahead	● 4.6 Skills Lab - Dress Copperwind's Site in Its Own Colors (Parts 1-3 and Questions & Analysis)

MODULE	LEARNING OBJECTIVES	ACTIVITIES	ASSESSMENTS
Module 5 The Box Model and Typography Primary CLOs: V, IX	5.1 Control the space inside and around elements with padding, border, and margin, using individual and shorthand syntax 5.2 Style text with font stacks, sizes, and text properties chosen for readability 5.3 Diagnose spacing and readability problems with the DevTools box-model diagram and the chapter's typography guidelines	- Read Sections: 5.1 - 5.5 - Practice: Try It Yourself - Debug: Fix It  - Answer: Quick Checks - Recall: Retrieval Practice - Review, Further Reading, and Looking Ahead	5.6 Skills Lab - Give Copperwind's Site Breathing Room (Parts 1-3 and Questions & Analysis) 5.7 Question & Discuss  The Beige Internet
Module 6 Layout with Flexbox Primary CLOs: V, IX	6.1 Arrange page content with flex containers, controlling alignment, spacing, and wrapping along the main and cross axes 6.2 Differentiate elements by tree relationship and interaction state to scope styles with descendant combinators and accessible pseudo-classes 6.3 Construct an accessible navigation bar from the semantic nav list using Flexbox, combinators, and pseudo-classes	- Read Sections: 6.1 - 6.5 - Practice: Try It Yourself - Debug: Fix It  - Answer: Quick Checks - Recall: Retrieval Practice - Review, Further Reading, and Looking Ahead	6.6 Skills Lab - The Copperwind Site Gets Its Layout (Parts 1-3 and Questions & Analysis)
Module 7 UX and Web Design Primary CLOs: III, XII	7.1 Differentiate user experience (UX) from user interface (UI) decisions, using the five UX principles: usability, accessibility, consistency, feedback, and responsiveness 7.2 Construct a sitemap and wireframes that plan a multi-page site's structure and layout before any code is written 7.3 Critique an existing site's navigation and page consistency against UX principles to produce a site plan	- Read Sections: 7.1 - 7.5 - Practice: Try It Yourself - Debug: Fix It  - Answer: Quick Checks - Recall: Retrieval Practice - Review, Further Reading, and Looking Ahead	7.6 Skills Lab - The Copperwind Site Grows Up (Parts 1-3 and Questions & Analysis) 7.7 Question & Discuss  Skip the Sketch?
Module 8 Responsive Design and Media Queries Primary CLOs: X	8.1 Implement the viewport meta tag on every page of a site, testing the result in browser DevTools device mode 8.2 Construct media queries that adjust layout, spacing, and type at content-driven breakpoints 8.3 Diagnose where a layout fails across screen widths and which layer of a base-plus-overrides stylesheet owns the fix	- Read Sections: 8.1 - 8.5 - Practice: Try It Yourself - Debug: Fix It  - Answer: Quick Checks - Recall: Retrieval Practice - Review, Further Reading, and Looking Ahead	8.6 Skills Lab - The Copperwind Site Meets Every Screen (Parts 1-3 and Questions & Analysis)
Module 9 Web Accessibility Primary CLOs: VIII	9.1 Implement accessible structure and navigation: ordered headings, landmarks, descriptive link text, and visible focus styles 9.2 Apply WCAG's perceivability rules to color, type, and images: AA contrast, color-independent meaning, rem-sized text, and purpose-matched alt text 9.3 Evaluate pages against WCAG Level AA with an accessibility evaluator and human checks, prioritizing repairs	- Read Sections: 9.1 - 9.5 - Practice: Try It Yourself - Debug: Fix It  - Answer: Quick Checks - Recall: Retrieval Practice - Review, Further Reading, and Looking Ahead	9.6 Skills Lab - The Copperwind Site Passes the Audit (Parts 1-3 and Questions & Analysis) 9.7 Question & Discuss  The Million-Dollar Widget

MODULE	LEARNING OBJECTIVES	ACTIVITIES	ASSESSMENTS
Module 10 HTML Tables Primary CLOs: V, VIII	10.1 Differentiate data that belongs in a table from content that belongs in lists or layout, justifying the choice 10.2 Construct accessible data tables with rows, header and data cells, captions, and header scope 10.3 Produce Copperwind's events page: a styled, readable schedule table integrated into the site	- Read Sections: 10.1 - 10.5 - Practice: Try It Yourself - Debug: Fix It  - Answer: Quick Checks - Recall: Retrieval Practice - Review, Further Reading, and Looking Ahead	10.6 Skills Lab - The Events Page (Parts 1-3 and Questions & Analysis)
Module 11 HTML Forms Primary CLOs: VII	11.1 Construct labeled form controls: text and email inputs, radio groups, checkboxes, select menus, textareas, and a submit button 11.2 Demonstrate how submitted form data travels: name-value pairs, GET and the query string, POST, and the server's role in concept 11.3 Design the program's join page: an accessible, styled signup form that collects only what it needs	- Read Sections: 11.1 - 11.5 - Practice: Try It Yourself - Debug: Fix It  - Answer: Quick Checks - Recall: Retrieval Practice - Review, Further Reading, and Looking Ahead	11.6 Skills Lab - The Join Page (Parts 1-3 and Questions & Analysis) 11.7 Question & Discuss  The Last Web Developer? (Overall Course Concepts)
Module 12 Scripting Concepts and Publishing Primary CLOs: VI, XI, XII	12.1 Illustrate what scripting adds to a site: client-side behavior in the browser and server-side processing in concept 12.2 Perform the full pre-flight check and publish the site to a web server with secure file transfer 12.3 Produce the complete multi-page Copperwind site: the home page, six-page navigation, and every standard the course taught	- Read Sections: 12.1 - 12.5 - Practice: Try It Yourself - Debug: Fix It  - Answer: Quick Checks - Recall: Retrieval Practice - Review, Further Reading, and Course Conclusion	FINAL CAPSTONE 12.6 Skills Lab - The Site Ships (Parts 1-3 and Questions & Analysis)
