

MODULE	LEARNING OBJECTIVES	ACTIVITIES	ASSESSMENTS
Module 0 START HERE: Course Orientation	● 0.1 Configure Canvas notification settings and verify access to required course platforms and tools ● 0.2 Examine course policies, grading criteria, and campus support resources to prepare for academic success ● 0.3 Compose a reflective learning plan connecting personal goals and prior experience to course learning outcomes	● Syllabus and course policy review ● Canvas navigation and tools tour ● Academic integrity and AI use overview	● 0.5 Question & Discuss  Let's Get to Know Each Other (intro. discussion) ● 0.6 Confirm Your Course Readiness & Syllabus Review
Module 1 Welcome and A+ Roadmap Primary CLOs: ● I, IV, VI, VIII	● 1.1 Describe the key roles and responsibilities of an IT specialist in an organizational setting ● 1.2 Apply a structured troubleshooting methodology to solve technical problems effectively ● 1.3 Demonstrate critical thinking skills when approaching unfamiliar technology challenges	● Read Sections: 1.1 - 1.3 ● 1.1 - The Hero of Problem Solving ● 1.2 - The Troubleshooting Methodology ● 1.3 - Additional Resources	● 1.4 - Module Quiz
Modules 2 - 10 Review Modules	● Concepts Covered in BPC170	● Differentiate BPC170 & 270 CompTIA Practice	● No Assessments
Module 11 Managing Support Procedures Primary CLOs: ● XIV, XV, XVI, XVII	● 11.1 Apply best practices for creating and managing technical documentation, incident tickets, and knowledge base articles ● 11.2 Demonstrate professional communication skills when dealing with customers and colleagues in various support scenarios ● 11.3 Compare different operating systems and explain their purposes, file systems, and compatibility considerations	● Read Sections: 11.1 - 11.4 ● 11.1 - Documentation ● 11.2 - Professional Communication ● 11.3 - Types of Operating Systems ● 11.4 - Additional Resources	● 11.1.13 - Lab: Create a Ticket ● 11.1.14 - Lab: Close a Ticket ● 11.3.8 - Lesson Review ● 11.5 - Module Quiz
Module 12 Configuring Windows Primary CLOs: ● I, II, VIII	● 12.1 Configure Windows user and system settings to address common user requirements and preferences ● 12.2 Install and manage applications based on system requirements and distribution methods ● 12.3 Implement cloud-based productivity tools and understand their advantages and limitations	● Read Sections: 12.1 - 12.5 ● 12.1 - Windows User Settings ● 12.2 - Windows System Settings ● 12.3 - Install and Configure Applications ● 12.4 - Cloud-Based Applications ● 12.5 - Additional Resources	● 12.4.6 - Lab: Create Azure Storage Account ● 12.4.7 - Lesson Review ● 12.6 - Module Quiz

MODULE	LEARNING OBJECTIVES	ACTIVITIES	ASSESSMENTS
Module 13 Managing Windows Primary CLOs: I, II, VIII	13.1 Use Windows management consoles to configure system settings, manage users, and maintain disk partitions 13.2 Apply command-line tools to automate routine tasks and manage files, directories, and system settings 13.3 Configure Windows networking features to establish connectivity, manage IP settings, and implement security measures	- Read Sections: 13.1 - 13.4 13.1 - Use Management Consoles 13.2 - Command-Line Tools 13.3 - Windows Networking 13.4 - Additional Resources	13.3.7 - Lab: Configure a VPN Connection 13.3.9 - Lab: Local Firewall Settings 13.3.10 - Lab: Configure TCP/IP Settings on Win10 13.3.11 - Lab: Configure TCP/IP Settings on Win11 13.3.12 - Lesson Review 13.5 - Module Quiz 13.6 Question & Discuss  Service and Windows Foundations
Module 14 Supporting Windows Primary CLOs: I, II, VIII, XII, XIII	14.1 Apply network troubleshooting tools and techniques to resolve connectivity issues in both local and remote Windows environments 14.2 Use remote access technologies to provide technical support and system management without physical access 14.3 Utilize performance monitoring tools to diagnose system issues and implement Windows OS troubleshooting methods	- Read Sections: 14.1 - 14.5 14.1 - Troubleshoot Windows Networking 14.2 - Remote Access Technologies 14.3 - Performance and Troubleshooting Tools 14.4 - Troubleshoot Windows OS Problems 14.5 - Additional Resources	14.4.3 - Lab: Boot into the Win Recovery 14.4.5 - Lab: Create Restore Point 14.4.9 - Lab: Config Boot Order 14.4.14 - Lesson Review 14.6 - Module Quiz
Module 15 Securing Windows Primary CLOs: I, II, VI, VII, VIII	15.1 Apply logical security concepts including user management, authentication methods, and encryption principles to protect Windows systems 15.2 Configure Windows security settings using appropriate tools and features to implement security controls in various environments 15.3 Manage Windows shares and permissions to ensure secure resource access while maintaining user productivity	- Read Sections: 15.1 - 15.4 15.1 - Logical Security Concepts 15.2 - Win Security Settings 15.3 - Windows Shares 15.4 - Additional Resources	15.3.6 - Lab: Configure NTFS Permissions 15.3.11 - Lab: Support AD Domain Networking 15.3.12 - Lesson Review 15.5 - Module Quiz 15.6 Question & Discuss  Supporting and Securing Windows

MODULE	LEARNING OBJECTIVES	ACTIVITIES	ASSESSMENTS
Module 16 Installing Operating Systems Primary CLOs: I, II	16.1 Compare different Windows editions and identify appropriate use cases for each based on feature sets and organizational requirements 16.2 Implement various installation methods including clean installations, in-place upgrades, and unattended installations 16.3 Troubleshoot and resolve common installation and upgrade issues to ensure successful OS deployment	- Read Sections: 16.1 - 16.3 16.1 - Windows Editions 16.2 - OS Installations 16.3 - Additional Resources	16.1.6 - Lab: Windows 11 Features/Desktop 16.2.6 - Lesson Review 16.4 - Module Quiz
Module 17 Supporting Other OS Primary CLOs: I, II, XII, XIII	17.1 Identify common features and tools of Linux client/desktop operating systems 17.2 Apply basic Linux commands for file, user, and package management 17.3 Explain common features and tools of the macOS operating system	- Read Sections: 17.1 - 17.4 17.1 - Linux Features 17.2 - Package and Network Management 17.3 - macOS Features 17.4 - Additional Resources	17.2.6 - Lab: Config Linux 17.3.11 - Lesson Review 17.5 - Module Quiz 17.6 - Checkpoint Review (modules 11 - 17) 17.7 Question & Discuss  Supporting Other Operating Systems
Module 18 Configuring SOHO Network Primary CLOs: VI, VII, VIII	18.1 Compare and contrast common social engineering attacks, threats, and vulnerabilities 18.2 Analyze different wireless security protocols and authentication methods 18.3 Apply security settings on SOHO wireless and wired networks	- Read Sections: 18.1 - 18.5 18.1 - Attacks, Threats, and Vulnerabilities 18.2 - Wireless Security 18.3 - SOHO Router Security 18.4 - Additional Security 18.5 - Additional Resources	18.4.2 - Lab: Implement Physical Security 18.4.5 - Lesson Review 18.6 - Module Quiz
Module 19 Managing Security Settings Primary CLOs: II, VI, VIII, XII, XIII	19.1 Apply workstation security options and hardening techniques to protect systems 19.2 Configure and implement Microsoft Windows security features 19.3 Analyze common security issues and implement appropriate solutions	- Read Sections: 19.1 - 19.5 19.1 - Account Security 19.2 - Workstation Security 19.3 - Browser Security 19.4 - Troubleshoot Workstation Security 19.5 - Additional Resources	19.4.13 - Lesson Review 19.6 - Module Quiz 19.7 Question & Discuss  Cross-Platform Systems and Security
Module 20 Supporting Mobile Software Primary CLOs: VI, VIII, IX, XII, XIII	20.1 Apply common methods for securing mobile devices 20.2 Troubleshoot common mobile OS and application issues 20.3 Identify and resolve mobile security problems	- Read Sections: 20.1 - 20.4 20.1 - Mobile OS Security 20.2 - Troubleshoot Mobile OS and App Software 20.3 - Troubleshoot Mobile OS and App Security 20.4 - Additional Resources	20.3.4 - Lesson Review 20.5 - Module Quiz 20.6 - Checkpoint Review (modules 18 - 20)

MODULE	LEARNING OBJECTIVES	ACTIVITIES	ASSESSMENTS
Module 21 Using Data Security Primary CLOs: II, VI, VIII	21.1 Implement workstation backup and recovery methods to protect critical organizational data 21.2 Apply appropriate data handling practices including classification, preservation, and destruction methods 21.3 Evaluate artificial intelligence applications and limitations in IT security workflows	- Read Sections: 21.1 - 21.4 21.1 - Data Backup and Recovery 21.2 - Data Handling 21.3 - Artificial Intelligence 21.4 - Additional Resources	21.1.3 - Lab: Back Up the Computer 21.1.6 - Lab: Restore Data from File History 21.3.5 - Lesson Review 21.5 - Module Quiz
Module 22 Implementing Operational Procedures Primary CLOs: I, II, XIV, XV, XVI, XVII	22.1 Apply change management and inventory tracking procedures to maintain accurate documentation of IT resources 22.2 Implement common safety and environmental procedures when working with computer equipment 22.3 Develop basic scripts to automate routine IT tasks and improve operational consistency	- Read Sections: 22.1 - 22.4 22.1 - Change and Inventory Management 22.2 - Common Safety and Environmental Procedures 22.3 - Scripting Basics 22.4 - Additional Resources	22.3.7 - Lab: JavaScript 22.3.10 - Lesson Review 22.5 - Module Quiz 22.6 Question & Discuss  The Future of Operating Systems (Overall Course Concepts)
Module 23 Summative Core 2 Practice Exams Primary CLOs: I through XVII	23.1 Assess your knowledge of operating system concepts and implementation through structured practice exams 23.2 Evaluate your understanding of security principles and implementation techniques for workstations and networks 23.3 Demonstrate your troubleshooting skills for software and operating system issues across various platforms	- Read Sections: C.2.1 - C.2.4 - Operating Systems - Security - Software Troubleshooting - Operational Procedures	- C.2.1 - Exam Practice 1: Operating Systems - C.2.2 - Exam Practice 2: Security - C.2.3 - Exam Practice 3: Software Troubleshooting - C.2.4 - Exam Practice 4: Operational Procedures
Module 24 A+ Core 2 Final Exam Primary CLOs: I through XVII	24.1 Demonstrate knowledge of operating systems, security, software troubleshooting, and operational procedures 24.2 Apply time management techniques to complete a certification-style exam within the allotted timeframe 24.3 Identify your final areas of strength and weakness before taking the actual CompTIA A+ certification exam	- Comprehensive review of Modules 11 - 22 - Module 23 practice exam gap analysis - Final preparation and time management strategies	C.2.5 - Final Exam: A+ 220-1202 Core 2 (90 questions, 90 minutes, PBQs included)
